

SHAH VIDHI MEHUL KUMAR

B.Tech. - Computer Science & Engineering

Ph: +91-8320907714

Email: vidhi.m.shah@nuv.ac.in

Vadodara, Gujarat, India - 390001

LinkedIn: <https://www.linkedin.com/in/vidhi-shah-b98724289/>

CAREER OBJECTIVE

Motivated and passionate final-year Computer Science Engineering student seeking opportunities to apply skills in Artificial Intelligence, Machine Learning, Cloud Computing, Web Development, and Software Development to real-world projects. Eager to contribute innovative ideas, problem-solving abilities, and technical knowledge while continuously learning modern technologies and growing professionally in the IT industry.

KEY EXPERTISE

Web Development AI ML Database Management System SQL Data Analysis Software Development

EDUCATION

Navrachana University

2023 - 2027

B.Tech. - Computer Science & Engineering | CGPA: 8.27 / 10

Phoenix School, Vadodara

2023

12th | GSEB | Percentage: 56.61 / 100

Phoenix School, Vadodara

2021

10th | GSEB | Percentage: 91.50 / 100

PROJECTS

Vegetable Classifier

17 May, 2026 - 19 May, 2026

Mentor: Dr. Jaideep Raulji | Team Size: 4

Key Skills:

Python AI ML CNN Deep Learning Tensor Flow Data Processing Computer Vision Model training
Data Collection

Project Link: https://github.com/vidhi285/vegetable_classifier

Developed a real-time AI-based vegetable classification system using Convolutional Neural Networks (CNN) to identify vegetables such as peanut gourd, ivy gourd, lady finger, chilli, and peas. Trained the deep learning model on more than 10,000 images to improve classification accuracy and prediction performance. Implemented image preprocessing, model training, and real-time prediction functionalities using machine learning techniques and computer vision concepts for efficient vegetable recognition.

Python to C Converter

01 May, 2026 - 10 May, 2026

Mentor: Prof. Sanjay Vij | Team Size: 2

Key Skills:

Python Compiler Design Syntax Translation Programming Logic Code Conversion Problem Solving Tkinter
GUI Development

Project Link: <https://github.com/vidhi285/Python-to-C-Converter>

Developed a GUI-based Compiler Design project using Python and Tkinter that converts basic Python code into equivalent C code through syntax translation techniques. Implemented support for loops, conditional statements, input/output operations, comments, and variable declarations with an interactive and user-friendly graphical interface. Focused on code parsing, logic conversion, syntax mapping, and improving user interaction to simplify understanding of compiler design and programming language translation concepts.

Real-Time Sentiment Analysis System

15 Feb, 2026 - 30 Apr, 2026

Mentor: Ms. Rupali Sindhe, Dr. Jaideep Raulji, Dr. Yogesh Chaudhari | Team Size: 4

Key Skills:

Python Artificial Intelligence Machine Learning Deep Learning NLP Youtube API Big Data Analytics
Data Visualization AWS EC2 AWS Cloud Deployent Model Training Image Processing Tensor Flow

Project Link: <https://github.com/vidhi285/Sentiment-Analysis>

Developed an AI-powered Real-Time Sentiment Analysis System to classify YouTube comments into positive, neutral, and negative categories using machine learning and natural language processing techniques. Trained text-based sentiment models on more than 3

million records and emoji recognition models on 1000+ emoji images for improved sentiment prediction accuracy. Integrated YouTube API for live comment extraction and implemented AWS EC2 cloud deployment with virtual server configuration for scalable real-time processing. Focused on data preprocessing, model training, sentiment classification, cloud deployment, and interactive result analysis.

3D Solar System Simulation

15 Oct, 2025 - 30 Oct, 2025

Mentor: Dr. Yogesh Chaudhari | Team Size: 2

Key Skills:

- Python
- OpenGL
- Pygame
- Blender
- Computer Graphics
- 3D Modeling
- Animation
- Rendering
- Simulation Development
- Problem Solving
- Interactive Design

Developed a 3D Solar System Simulation using Python, OpenGL, Pygame, and Blender to visualize planetary motion and orbit systems interactively. Implemented animated planet rotation, orbit visualization, and real-time rendering techniques to create an engaging computer graphics-based simulation. Designed 3D models and interactive features to improve visualization and user experience while enhancing knowledge of graphics programming, animation, and rendering concepts.

Expense Tracker Application

10 Sep, 2025 - 05 Oct, 2025

Team Size: 1

Key Skills:

- Android Studio
- Java
- Mobile Application Development
- SQLite
- UI/UX Design
- Financial Record Management
- Frontend Development
- Problem Solving
- Application Design

Developed an Android Studio-based mobile application to manage daily expenses and maintain financial records efficiently. Implemented features for adding, updating, and tracking expense details with a simple and user-friendly interface. Designed the application to help users monitor spending habits, organize financial data, and improve personal budget management through smooth navigation and structured record handling.

Event Management Mobile Application

02 Sep, 2025 - 05 Oct, 2025

Team Size: 2

Key Skills:

- Android Studio
- Java
- Mobile Application Development
- UI/UX Development
- Room Database
- User Authentication
- Frontend Development
- Poblem Solving
- Application Design

Designed and developed a mobile application for Navrachna University events using Android Studio. Implemented features that allow users to register for events, view event schedules, and access program details through a user-friendly interface. Focused on responsive mobile design, smooth navigation, and efficient data handling to enhance user experience and simplify event management processes.

AI-Powered Chatbot Application

20 Apr, 2025 - 28 Apr, 2025

Team Size: 2

Key Skills: MIT App Inventor Mobile App Development UI/UX Design User Interaction App Interface Design

Developed a mini AI-powered chatbot mobile application using MIT App Inventor for interactive communication. Designed a simple and user-friendly interface to improve accessibility and user experience. Implemented chatbot response functionality, interactive features, and smooth navigation to create an engaging mobile application for real-time communication.

Surgical Product Manufacturing Management System

14 Feb, 2024 - 05 May, 2024

Team Size: 3

Key Skills:

- Java
- Java Swing
- Object-Oriented Programming
- Database Management
- MySQL
- CRUD Operation
- UI/UX Development
- Problem Solving
- NetBeans

Developed a desktop-based Surgical Product Manufacturing Management System to manage company operations efficiently. Implemented functionalities for adding, modifying, deleting, and managing records related to employees, suppliers, customers, products, orders, and payments. Designed user-friendly graphical interfaces using Java Swing and integrated database operations for secure data handling and management. Focused on improving operational efficiency, data organization, and usability through structured application design.

Games Using Tkinter

15 Apr, 2024 - 02 May, 2024

Mentor: Prof. Shardav Bhatt | Team Size: 1

Key Skills: Python Tkinter GUI Development Game Development Logic Building Object Oriented Programming

Project Link: <https://github.com/vidhi285/Python-Tkinter-Project>

Developed interactive desktop games including Tic Tac Toe, Pong, and Memory Puzzle using Python Tkinter. Designed graphical user interfaces with interactive controls, game logic, and real-time user interaction features. Implemented event handling, score tracking, and gameplay mechanics to create engaging and user-friendly gaming experiences while improving programming and problem-solving skills.

Watch Website

12 Feb, 2024 - 10 Apr, 2024

Mentor: Ms. Ujjwala Petigara | Team Size: 4

Key Skills:

- HTML
- CSS
- Javascript
- E-COMMER
- FRONTEND DEVELOPMENT
- RESPONSIVE DESIGN
- UI/UX DESIGN
- Web Design

Developed an e-commerce website for browsing and purchasing branded watches with an attractive and user-friendly interface. Designed responsive web pages with product listings, pricing details, and smooth navigation to enhance customer experience. Implemented features for product exploration and online shopping workflow while focusing on modern web design and usability.

Web Post/Chat Application Using Flask

12 Oct, 2023 - 15 Nov, 2023

Mentor: Prof. Dhaval Mehta | Team Size: 4

Key Skills:

- FLASK
- PYTHON
- HTML
- CSS
- FRONTEND DEVELOPMENT
- BACKEND DEVELOPMENT
- WEB DEVELOPMENT

Developed an Instagram-like web application using Flask that allows users to create posts, interact with content, and communicate through real-time chat functionality. Implemented user-friendly interfaces, dynamic content handling, and responsive web pages for smooth user interaction. Worked on backend integration, data management, and real-time communication features to provide an engaging social media-style experience.

Goa Tourism Website

02 Aug, 2023 - 10 Oct, 2023

Mentor: Prof. Amit Parmar | Team Size: 4

- Key Skills:
- HTML
- CSS
- WEB DESIGN
- FRONTEND DEVELOPMENT
- RESPONSIVE DESIGN

Developed a tourism-based website providing detailed information about Goa's famous tourist attractions, hotels, restaurants, and travel destinations. Designed an interactive and user-friendly interface with responsive web pages for better accessibility.

ASSESSMENTS / CERTIFICATIONS

Diploma in Computer Application (DCA)

Provider: Jan Jagruti Saksharta Abhiyan

Aggregate: 80 / 100

Key Skills:

- Computer Fundamentals
- Typing skills
- Documentation
- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- HTML
- Tally

Successfully completed the Diploma in Computer Application (DCA) certification program with A+ grade. Learned computer fundamentals, typing skills, documentation, Microsoft Office tools, HTML basics, and Tally accounting software. Developed practical knowledge in computer operations, document preparation, internet usage, and basic web development concepts useful for academic and professional applications.

AWS Academy Graduate - Data Engineering

Provider: Amazon Web Services (AWS) Academy

Key Skills:

- AWS Cloud
- Data Engineering
- ETL Workflows
- Data Pipelines
- Big Data
- Data Analytics
- Cloud Computing
- AWS Glue
- AWS Athena
- Amazon S3
- Real-Time Data Processing
- Batch Processing
- Cloud Storage
- Data Processing

Successfully completed the AWS Academy Graduate - Data Engineering certification program consisting of 40 hours of intensive cloud and data engineering training. Gained practical knowledge of ETL workflows, cloud-based storage solutions, data pipelines, real-time and batch data processing, and big data analytics using AWS services. Developed understanding of how modern organizations manage and analyze large-scale data efficiently through cloud technologies and industry-standard data engineering practices.

AWS Academy Graduate – Machine Learning Foundations

Provider: Amazon Web Services (AWS) Academy

Key Skills:

- AI
- ML
- NLP
- Computer Vision
- Generative AI
- AWS Cloud
- AWS Machine Learning Services
- Model Training
- Deep Learning

Successfully completed the AWS Academy Graduate - Machine Learning Foundations certification program with 20 hours of industry-oriented training. Gained practical exposure to machine learning concepts, Natural Language Processing (NLP), Computer Vision, Generative AI fundamentals, and AWS machine learning services. Developed understanding of AI model training, cloud-based machine learning workflows, and modern artificial intelligence technologies used in real-world applications.

AWS Academy Graduate – Cloud Foundations

Provider: Amazon Web Services (AWS) Academy

Key Skills:

- Cloud Computing
- AWS Core Services
- Cloud Security
- AWS Architecture
- AWS Pricing
- AWS Support Services
- Cloud Infrastructure
- Virtualization
- Networking Basics
- AWS Cloud Fundamentals

Successfully completed the AWS Academy Graduate - Cloud Foundations certification program with 20 hours of cloud computing training. Gained strong foundational knowledge of cloud computing concepts, AWS core services, cloud architecture, security principles, pricing models, and AWS support services. Developed understanding of how cloud technologies are used to build scalable, secure, and efficient modern digital infrastructures using Amazon Web Services (AWS).

Google Antigravity Learning Badge

Provider: Google for Developers

Key Skills:

- Agentic AI
- AI-Assisted Development
- Vibe Coding
- Software Development Life Cycle (SDLC)
- Antigravity IDE
- Antigravity CLI
- Google AI Studio
- Prompt Engineering
- Application Deployment
- Software Engineering
- Generative AI

Earned the Google Antigravity Learning Badge through the Google Developer Program. This learning experience focused on agentic engineering, AI-assisted development workflows, and the evolution from traditional coding to intent-driven development. Gained hands-on exposure to Antigravity 2.0, Antigravity IDE, Antigravity CLI, Google AI Studio, and Cloud Run while learning how AI agents can accelerate the software development lifecycle and support autonomous application development.

PERSONAL INTERESTS / HOBBIES

- Travelling, Listening Music
